DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-6, drawn to a method, classified in class 427, subclass 255.34.
- II. Claims 7-12, drawn to an apparatus, classified in class 118, subclass 715.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the reactor could be used to deposit other than III-V nitride films.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

During a telephone conversation with Kevin Brown on 14 April 2003 a provisional election was made with traverse to prosecute the invention of Group I, claims 1-6. Affirmation of this election must be made by applicant in replying to this Office action. Claims 7-12 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the

Application/Control Number: 10/010,945

Art Unit: 1762

Page 3

currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Priority

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, the phrase "preparing a reactor horizontally" is confusing. What is the reactor being prepared for? What component is horizontal? The specification appears to describe what is commonly known in the art as a horizontal reactor. The examiner suggests that the language "providing a horizontal reactor" may be more clear.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are

Application/Control Number: 10/010,945

Art Unit: 1762

such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 1-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kryliouk et al. (6,218,280) in view of McNeilly et al. (4,047,496).

Kryliouk et al. disclose a process comprising depositing a film of epitaxial III-V nitride of formula $Al_xIn_yGa_{1-x-y}N$ (x between 0 and 1, y between 0 and 1 and x + y between 01 and 1) and exemplify deposition of GaN using a horizontal cold wall reactor by introducing III raw material, V raw material and carrier gas with a heated substrate (col. 4, lines 10-36 and col. 8, lines 55-60).

Kryliouk is silent as to the structure of the horizontal cold wall reactor and therefore does not explicitly disclose that the wall opposite the substrate is directly cooled.

McNeilly et al. disclose that a radiant heated horizontal cold walled reactor having direct cooling of the wall opposite the substrate is effective for depositing epitaxial films and have advantages over rf systems as shown at col. 1, line 64 to col. 2 line 29 (Figure 1, and accompanying discussion at col. 6).

Application/Control Number: 10/010,945 Page 5 Art Unit: 1762 It would have been obvious to have used the particular horizontal cold wall reactor of McNeilly to deposit the III-V nitride films as this system would be expected to provide advantages over the conventional rf systems as defined by McNeilly. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Timothy H. Meeks whose telephone number is (703) 308-3816. The examiner can normally be reached on Mon., Tues., Thurs.(6-6:30), Fri.(6:30-10:30). If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Shrive P. Beck can be reached on (703) 308-2333. The fax phone numbers for the organization where this application or proceeding is assigned are (703) 872-9310 for regular communications and (703) 872-9311 for After Final communications. Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-0661. Art Unit 1762 nf
